

The provider for Ignition Components

ideas and experience

Ignition components

As one of the main providers for ignition- and ionisation electrodes we offer a great variety of electrode shapes and customer-specific special solutions.

Diverse filters for EMC and a various selection of components for the production of connecting cables complete our range of products. If you look for a special solution or mass production - we are your partner!

Challenge us !

Quickest realization of your ideas and designs by our experts

- Construction • Tool shop • Ceramic production
- Prototyping • Materials laboratory

Many years' experience regarding selection and processing

- of materials and components
- Plugs • Cables (loose or fix connected to the electrode)
- Electrodes • Ceramics • Sealing

Many years' co-operation

- All reputed manufacturers of heating appliances • Institutes of high reputation
- Well known high schools and universities

Close co-operation and joint developments together with the customer

- practice orientated • cost efficient • long-lasting • reliable

Flexible production and logistic concepts

- Special realizations, sample and individual solutions • Small series and spare parts
- Standard electrodes • Mass production

Extensive possibilities regarding design and concept

- Wire bending • Connection • EMC • Mounting
